# Guidance for IEP Teams on Determining Participation in South Carolina Alternate Assessments on Alternate Achievement Standards

## Introduction

This document is provided to assist individualized education program (IEP) teams in making decisions regarding whether Alternate Assessment on Alternate Achievement Standards (AA-AAS) is appropriate for an individual student.

The IEP team, which includes parents as equal partners, is responsible for determining if a student with a disability should participate in the general assessment with accommodations or in the alternate assessment. To document that an alternate assessment is appropriate for an individual student, the IEP team should review all important information about the student over multiple school years and multiple instructional settings (e.g., school, home, community) and determine that the student has a significant cognitive disability and meets all of the participation criteria for alternate assessment.

The state alternate assessments on alternate achievement standards are designed for students with significant cognitive disabilities who participate in a school curriculum that includes functional and life skills as well as academic instruction. The content, learning objectives, and expected outcomes for the academic instruction are extended to focus on the emerging, readiness (prerequisite), foundational and/or functional (real life) application of the general curriculum.

## Eligibility Criteria

The assessment is administered to students who meet the criteria listed below and who are the ages commensurate with typical students in the grades that are tested in the general assessment programs. Since many students who are eligible for the alternate assessment are non-graded, the student's age as of September 1 of the testing year determines if an eligible student will be assessed and on which form.

To participate in an Alternate Assessment on Alternate Achievement Standards (AA-AAS) a student must meet **all** of the following criteria:

- demonstrate a significant cognitive disability **and** adaptive skill deficits, which result in performance that is substantially below grade-level achievement expectations even with the use of accommodations and modifications;
- access the state approved curriculum standards at less complex levels and with extensively modified instruction;
- possess current adaptive skills requiring extensive direct instruction and practice in multiple settings to accomplish the application and transfer of skills necessary for application in school, work, home, and community environments;
- be unable to apply or use academic skills across natural settings when instructed solely or primarily through classroom instruction; and
- the inability to achieve the state grade-level achievement expectations is not the result of excessive or extended absences or social, cultural, or economic differences.

The *Age and Grade Reference Sheet* is available on the [SC Alternate Assessment Portal](#), to assist with age determination, form assignment, and yearly testing status for each alternate assessment.

## **Eligibility Descriptions**

Significant cognitive disability is characterized by ability scores on both verbal and nonverbal scales that are at least 2½–3 standard deviations below the mean.

Adaptive skills relate to independence in everyday living skills, including interpersonal and social interactions across multiple settings. To be eligible to participate in an alternate assessment students should demonstrate deficits in adaptive behavior skills with scores that are at least 2½–3 standard deviations below the mean in at least two adaptive skill domains.

A student with a significant cognitive disability requires substantial modifications, adaptations, or supports to meaningfully access the subject area content and requires intensive individualized instruction in order to acquire and generalize knowledge. The student’s instruction should be based on the *Prioritized Standards*, which provide access to the general education curriculum at emerging, readiness (prerequisite), foundational, and less complex skill levels.

Students who meet the eligibility criteria for alternate assessment may be classified in any of the disability categories listed in the Individuals with Disabilities Education Act (IDEA), as long as there is documentation that the student has a significant cognitive disability or severe intellectual disability and significant adaptive skills deficits.

It is important to keep in mind that some disability categories, as defined by the *State Board of Education Criteria for Entry into Programs of Special Education for Students with Disabilities* (43–243)<sup>1</sup>, may not meet the necessary criteria for participation in an alternate assessment. For example, a student who is evaluated and determined to qualify for special education services as a child with a Specific Learning Disability or Emotional Disability would not exhibit an intellectual disability according to the State Board of Education criteria. Also, while some students determined eligible under the categories of Other Health Impaired (OHI), Orthopedic Impairment (OI), and Autism may have concomitant cognitive impairment, often times they do not. Such students would not meet the necessary criteria for participation in an alternate assessment.

<sup>1</sup> [https://ed.sc.gov/scdoe/assets/file/programs-services/173/documents/43-243\\_1EligibilityCriteria.pdf](https://ed.sc.gov/scdoe/assets/file/programs-services/173/documents/43-243_1EligibilityCriteria.pdf)

## **Information the IEP Team can use to determine if alternate assessment is appropriate for an individual student**

The IEP team should review and discuss multiple sources of information. Some sources that the team may consider reviewing include: psychological evaluation reports, results of individual cognitive ability tests, adaptive behavior skills data, results of individual or group administered achievement assessments, district-wide alternate assessments, individual reading assessments, findings of communication or language proficiency assessments, teacher collected data from classroom observations, progress monitoring data, and IEPs.

The team should consider:

- IEP information including
  - present levels of academic achievement and functional performance (PLAAFP), goals, and short-term objectives. Short-term objectives are required for IEPs of students who participate in alternate assessment (Individuals with Disabilities Education Act, 2004 (IDEA) Section 614(d)(1)(A)(i)(I)(cc)).
  - information from both the student interests and preferences in section I and the PLAAFP in section II of the IEP related to post school outcomes for students of transition age in South Carolina. Many students who are eligible for alternate assessment will have post school outcomes that include community supports.
  - special considerations related to communication or English language learners.
- description of the student's curriculum and typical instruction and progress data. The student's curriculum should include academic instruction at emerging, readiness (prerequisite), foundational, and less complex skill levels based on the extended academic standards in ELA, mathematics, science, and social studies.
- teacher collected data and work samples from classroom and community-based instruction, if applicable. Although there should be evidence that a student who participates in an alternate assessment receives extensive instruction in functional curriculum and daily living skills, only academic instruction or English language proficiency is assessed with alternate assessment.
- descriptions of achievement levels for the alternate assessments. The team should determine if the alternate descriptions more appropriately capture the student's performance than do the descriptors for the general assessments. These can be found on the SCDE web site.
- examples of alternate assessment tasks to determine if they are more like the student's routine instruction and assessment than are the general assessment sample items. Examples of sample tasks can be found on the SCDE web site.

- results of district-wide alternate assessments. IDEA requires that students who are unable to participate in district-wide assessments even with appropriate accommodations receive an alternate assessment to the district assessment.
- results of individual reading assessments.
- achievement score data from the general assessment, if the student previously participated in the general assessment. Many students with and without disabilities score “Not Met” on general assessments and are reading below their assigned grade level. Below grade-level reading scores or poor performance on previous assessments alone does not indicate that the alternate assessment is the appropriate assessment for a student.
- information on communication modes from multiple data sources (e.g., classroom, homework, observations of expressive, receptive, written, and pragmatic language) along with standardized scores from norm-referenced tests. Review descriptions of adaptations or modifications that have been used to assist the student with communication.
- results of English language proficiency assessments if the student is also classified as an English language learner (ELL).

Worksheets and checklists designed to assist teams in collecting and reviewing evidence to determine if participation in alternate assessment is appropriate for an individual student may be found in the appendices. [Appendix A](#), *Initial Determination of Eligibility for Alternate Assessment Participation Worksheet*, is an **optional** worksheet for use by the IEP team to document existing data from various sources to facilitate the initial determination of alternate assessment participation. [Appendix B](#), *Review of Eligibility for Alternate Assessment Participation Checklist*, is an optional checklist that may be used both during initial determination and at annual IEP reviews to document that the alternate assessment is the appropriate assessment for a student. Appendix C *Review of Eligibility for Alternate Assessment Checklist for Students who are English Language Learners with Significant Cognitive Disabilities* may be used with students who are ELL with significant cognitive disabilities, ages 6 and 7. The decision regarding how students will participate in state and district-wide testing must be made annually. If an IEP team uses the worksheet or checklist it is recommended that a copy be maintained with the notes from the meeting as documentation required by IDEA Section 614 (d)(1)(A)(VI)(bb) to provide for state monitoring of student files (34 C.F.R. §§ 300.149 and 300.600 through 604.)

### **Alternate Assessment and Diploma Requirements**

**The IEP team should be aware that participation in alternate assessment on alternate achievement standards means that that the student is participating in a curriculum that does not lead to a high school diploma.** The achievement expectations for the alternate assessment are not the same as the expectations for the general assessment. Students must earn units in the core content as a requirement for a high school diploma. IEP teams should also be aware that if a student **without** a significant cognitive disability participates in the alternate assessment, the results will not reflect what the student knows and can do. The assessment

results may not be valid and the student may be considered as not participating in assessment for state and federal accountability purposes.

Additional Considerations	Check each statement if agree
The decision for this student to participate in the alternate assessment is <b>NOT</b> based on a specific categorical label or educational placement.	<input type="checkbox"/>
The student's inability to achieve state grade-level achievement expectations is <b>NOT</b> the result of excessive or extended absences or social, cultural, or economic differences.	<input type="checkbox"/>
The decision for this student to participate in the alternate assessment is <b>NOT</b> due to the fact that the student has English as a second language.	<input type="checkbox"/>
The decision for this student to participate in the alternate assessment is an IEP team decision and is <b>NOT</b> being made for administrative purposes and/or in anticipation of impact on school or district accountability results.	<input type="checkbox"/>
The decision for this student to participate in the alternate assessment is <b>NOT</b> based solely on the fact that the student's instructional reading level is below the grade level of the general assessment.	<input type="checkbox"/>
The decision for this student to participate in the alternate assessment is <b>NOT</b> based on the fact that the student is expected to perform poorly on the general assessment.	<input type="checkbox"/>

*If the response is **NO** for any of the eligibility criteria or considerations, the IEP team should consider the student for participation in the general state assessment with appropriate accommodations, if necessary.*

*If the response is **YES** to all criteria and considerations, the IEP team should consider the student for participation in the alternate assessment.*

# Appendix D

*Description of Alternate Assessments on  
Alternate Achievement Standards (AA-AAS) in  
South Carolina*

## **Description of Alternate Assessments on Alternate Achievement Standards (AA-AAS) in South Carolina**

### **South Carolina Alternate (SC-Alt) Online Assessment in Science and High School Subjects**

The SC-Alt Online Assessment is an online computer-based assessment that currently includes tests for Science in grades 4, 6, and 8 and Biology 1, English 1, Algebra 1 and US History and the Constitution (US History) in grade 11. Each assessment consists of 40 items and allows students to respond in their typical mode of communication, such as pointing and eye gazing to a response, which can be made up of words or picture symbols that represent an answer choice. In the SC-Alt Online Assessments, students use Text-to-Speech (TTS) to hear the question, response option, and any associated stimulus.

The items across subjects in the SC-Alt Online Assessment are linked at a prerequisite skill level to the state academic standards through varying complexity levels in the SC-Alt Science Support Guide and the English language arts (ELA), mathematics, and US History Prioritized Standards. The levels of complexity outlined in the SC-Alt Science Support Guide as well as in the ELA, mathematics, US History prioritized standards focus on determining the essential main ideas for students eligible for the alternate assessment.

The SC-Alt Online Assessment is scored against the South Carolina Academic Standards, but the expectations of performance are different from those for the general state assessments such as the SC Palmetto Assessment of State Standards (SCPASS), and the End-of-Course Examination Program (EOCEP). The alternate achievement standards describe what students know and can do related to the levels of complexity in Science and the prioritized standards in ELA, mathematics, and US History.

The SC-Alt only tests a student's achievement in academic subjects. IEP reports and other monitoring and assessment methods provide parents and teachers with information on how the student is progressing in the other areas in which he or she receives instruction.

### **South Carolina Alternate Assessment (SC-Alt) in Social Studies**

The assessment consists of a series of performance tasks in each subject area that allow students to respond in their typical mode of communication, such as pointing and eye gazing to a response, selecting objects or pictures or picture symbols that represent the answer choice, or using letters, words or sentences to complete a task.

The tasks are linked at a less complex or prerequisite skill level to the state academic content standards through *Social Studies Support Guide*. The skill levels included in the Support Guide are the basis of the assessment and should also be the basis of classroom instruction for students who participate in the SC-Alt.

The SC-Alt is scored against alternate achievement standards, meaning that the expectations of performance are different from those for the general state assessments such as the SC Palmetto

Assessment of State Standards (SCPASS). The prioritized skill levels describe what students know and can do related to the extended academic standards.

The SC-Alt Social Studies only tests a student's achievement in academic subjects. IEP reports and other monitoring and assessment methods provide parents and teachers with information on how the student is progressing in the other areas in which he or she receives instruction.

A student who is determined eligible to participate in the alternate assessments, must take the alternate assessment in all subject areas.

### **The National Center State Collaborative (NCSC) Alternate Assessment in English Language Arts (ELA) and mathematics**

The NCSC Alternate Assessment is an online computer-based assessment that includes a test for English Language Arts, as well as one for mathematics, in grades 3–8. The NCSC has developed Core Content Connectors (CCCs), linked to the Common Core State Standards (CCSS), which can be used to plan instruction and assessment for students who take the AA-AAS. The CCCs are less complex than the CCSS, focusing on the “big ideas” in each subject and grade.

The level of complexity and the length of the assessment will be determined for individual students using prescreening tools provided by NCSC. There will be about 30 test items for mathematics and 30 items for ELA. Each test is expected to take about 1.5–2 hours. However, it can be completed in multiple smaller time slots that meet the student's needs. For students with vision impairments, paper accommodations are available. For information on the Supported Browsers and the System Requirements for Online Testing, go to the South Carolina Alternate Assessment Portal <http://sc-alt.portal.airast.org>.

The SC-NCSC is scored against the SC College and Career Ready Prioritized Standards, meaning that the expectations of performance are different from those for the general state assessments such as the SC Ready. The prioritized standards have been deemed as the most important standards for students who take the alternate assessment.

The SC-NCSC ELA and mathematics only tests a student's achievement in academic subjects. IEP reports and other monitoring and assessment methods provide parents and teachers with information on how the student is progressing in the other areas in which he or she receives instruction.

A student who is determined eligible to participate in the alternate assessments, must take the alternate assessment in all subject areas.

## **Alternate ACCESS for ELLs**

The Alternate Assessing Comprehension and Communication in English State-to-State for English Language Learners (Alternate ACCESS for ELLs) is an assessment of English language proficiency (ELP) for students in grades 1–12 who are classified as English language learners (ELLs) and have significant cognitive disabilities that prevent their meaningful participation in the ACCESS for ELLs assessment.

The ACCESS for ELLs is a large-scale test of English language proficiency based on the WIDA English Language Development (ELD) standards. The ACCESS for ELLs is designed to assess all ELLs in grades K-12. The ACCESS for ELLs is designed to assess students' English language proficiency in five areas: Social and Instructional Language, language of English Language Arts, language of Mathematics, language of Science and language of Social Studies. The test is divided into four language domains (speaking, listening, reading, and writing). The IEP team should consider whether the student can take this assessment with accommodations or the Alternate ACCESS for ELLs.

The Alternate ACCESS for ELLs consists of items that are less complex than the ACCESS for ELLs assessment. The Alternate ACCESS for ELLs assesses four English language proficiency areas: Social and Instructional Language, language of English Language Arts, language of Mathematics, and language of Science. Like the ACCESS for ELLs, the Alternate ACCESS for ELLs is divided into four language domains (speaking, listening, reading, and writing).

The Alternate ACCESS for ELLs is based on alternate model performance indicators. The model performance indicators provide the expectations for what the student should be able to do and produce at the English language proficiency level. Therefore, the expectations of performance on the Alternate ACCESS for ELLs are different from the ACCESS for ELLs.

Students with significant cognitive disabilities in kindergarten should take the kindergarten ACCESS for ELLs.

Guidance designed to assist IEP teams in collecting and reviewing evidence to determine if participation in the Alternate ACCESS for ELLs is appropriate for an individual student may be found in Appendix C. A person with expertise in second language acquisition must be involved in the IEP decision-making process for students with disabilities who are English language learners.
